Tarif Code 19 05 90 55 000

SNACKS BARBEQUE 50 G

EAN Code pcs: 3872324001080
EAN Code crt: 3872324001097

For special moments...

We were the first in Bosnia & Herzegovina to launch packaged croissants with a long shelf life.

In spring 2008, Spanish Market Ltd. initiated its own manufacturing business and opened a manufacturing facility for packaged baked goods in Sarajevo. Our first product was placed on the market the very same year - a chocolate filled croissant with a shelf life of 45 days. This made us the first company in Bosnia and Herzegovina producing long shelf life croissants. Soon after, we also launched a 4-month shelf life croissant. This marked a start of the **Quickie** brand.

Since Spanish Market Ltd. is known for its extensive distribution channels, the Quickie brand gained on popularity. This, as well as consumers recognition of the product quality, provided us with further incentive to expand our product range.

In March 2010, the Quickie product range was complemented by two new product types: Quickie Mini croissant 65 gr and Quickie Muffins 60 gr. In a mission to achieve customer satisfaction, Spanish Market Ltd. strives towards continuous development of its production experts and introduction of modern technology. Special attention is paid to all segments of the production and technological process, while product quality is attributable to carefully selected raw materials of top quality. As a part of a regular practice, our products are under continuous control of the public health authorities, thus further contributing to their quality.

In June 2010, our company ventured into a product export to neighbouring markets. Today, our products can be found on markets of Croatia, Serbia and Montenegro. The same year, we also initiated exports to EU countries, where products were introduced under a different brand name (MON Croissants Vanilla and MON Croissants Cocoa).

We were the first company in the Western Balkans to launch a new product type and introduce a novelty to the market of salty snacks.

In December 2015, we have installed a production line for a new type of salty baked goods. This involves several types of salty baked snacks with a crunchy texture, prepared with olive oil and containing 100% natural ingredients - **Palitos & Tapas**. They contain no preservatives or artificial colors. The products are oven baked (not roasted) and are very tasty to eat in any occasion. All products are available in different packaging and have different weight.

The company holds ISO CERTIFICATES and operates in line with procedures of the HACCP system of quality management.
